

# Adding Agroforestry to a Grazing Property Field Day

Visit the Gray's beef and sheep farm and see how they've incorporated Agroforestry into their farming operation

Bob and Robyn Gray have revegetated 20% of their farm, and have a further 20% planted as Agroforestry.

Come and hear how and why they established the plantations, and what is required to manage the trees. Bob will talk about the benefits and challenges from a farming perspective.

The site has also been used as a demonstration over the last 12 years.

Clinton Tepper will present on the results of annual tree health monitoring, and Peter Ronalds will speak about soil carbon results.

We'll walk across the farm and see plantations of three different Eucalypt species.

## When

Wednesday, 3 May 2023

9.45am registration

10.00 am-1pm (lunch included)

## Where

Warragul South (address provided after registration)

## Register

Places are limited, and registrations essential.

Please register via this link:
